Mining Company

Profile

Exploring Resources,
Building the Future

Crawford & Stone

A Legacy in Mining Excellence

We are a leading mining company focused on delivering high-quality resources while ensuring environmental responsibility, safety, and community partnership in every project

- Experienced and trusted mining leader.
- Committed to eco-friendly operations.
- Operating globally with local focus.
- Innovation drives safe efficiency.

Crawford & Stone

Vision for the Future

We aim to lead the mining industry through sustainable practices, creating value for stakeholders while safeguarding the environment and local communities.

Vision

To be the global benchmark in sustainable mining and resource development.

Mission

Delivering resources responsibly while maximizing stakeholder value.

Commitment

Prioritizing safety, environment, and community well-being.

Approach

Driving innovation in every aspect of mining operations.

Crawford & Stone

Core Mining Services

Comprehensive mining services—exploration, extraction, processing, and logistics—delivered with safety and innovation.

Exploration

Geological surveys and advanced exploration technology for resource discovery.

Extraction

Safe, efficient mining operations with modern equipment.

Processing

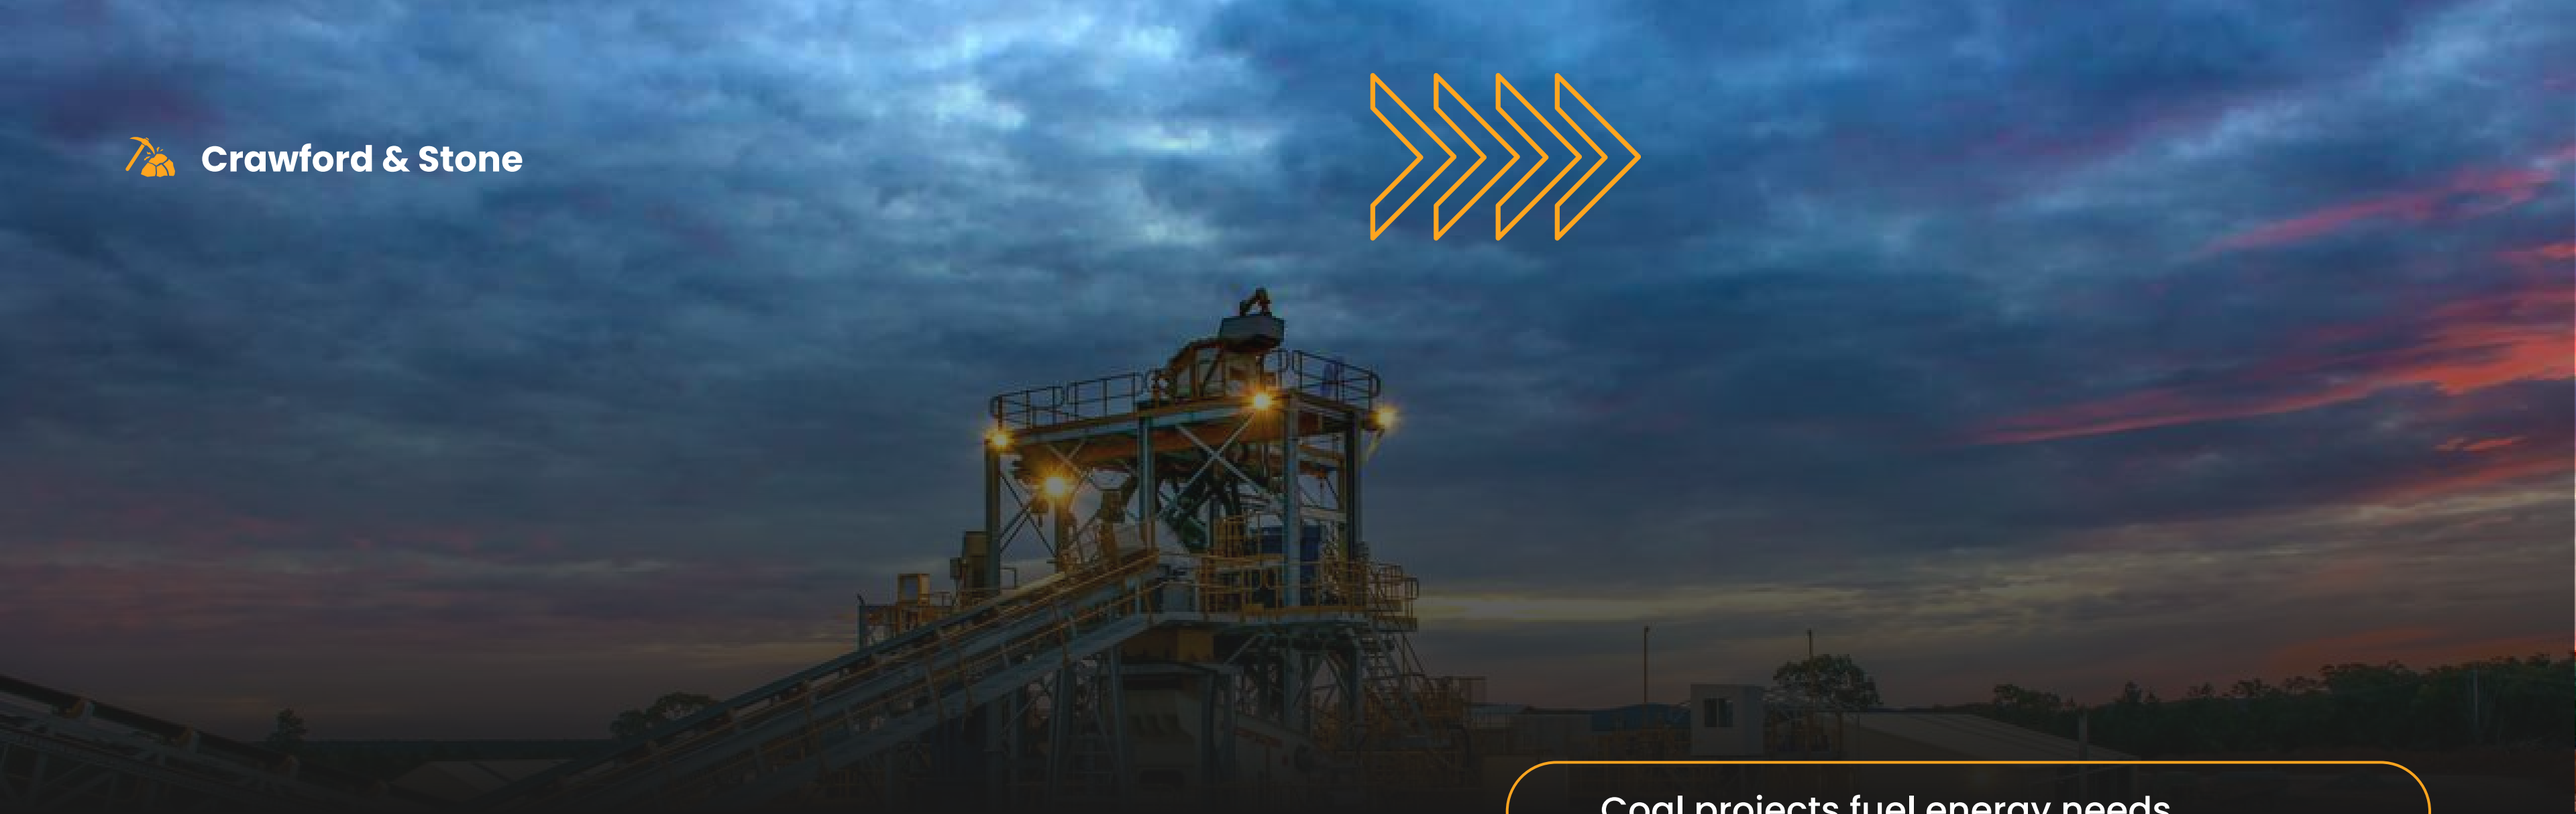

High-quality refining and mineral processing solutions.

Logistics

Reliable transport and distribution for global markets

Crawford & Stone

Our Achievements

Our mining projects span coal, gold, and copper, delivering industrial growth while ensuring sustainability and community value.

- Coal projects fuel energy needs.
- Gold mined with ethical focus.
- Copper supports infrastructure growth.
- Community projects create local jobs.

Crawford & Stone

Sustainable Mining Practices

Our sustainability focus includes eco-friendly mining, renewable energy use, and community empowerment, ensuring responsible operations for long-term success.

Eco-Friendly Practices

Reducing emissions and protecting natural habitats.

Land Restoration

Rehabilitating mining sites for future use.

Water Management

Ensuring responsible usage and clean water supply.

Community Engagement

Education, healthcare, and economic initiatives.

Warner & Spencer

August 2028

Skilled Experts in Mining

A skilled mining workforce ensuring safety, innovation, and reliability in all operations.

Alexander Aronowitz

Lead Engineer

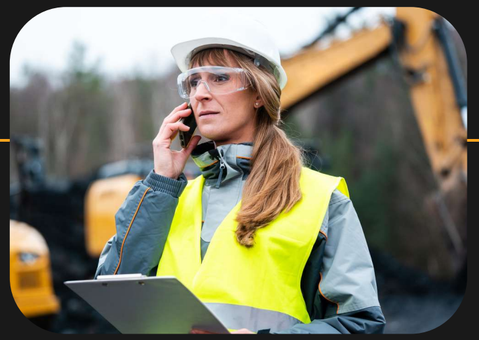

Driving innovation and safety in mining operations through modern technologies and proven expertise.

Aaron Loeb

Senior Geologist

Ensuring accurate exploration, resource management, and sustainable geological planning for long-term value.

Estelle Darcy

Project Manager

Overseeing large-scale mining projects with efficiency, precision, and strong leadership.

Benjamin Shah

Operations Specialist

Maintaining on-site operations with dedication, technical knowledge, and a focus on safety.

Trusted Collaborations

Strong partnerships with industries and governments drive sustainable growth, reflecting trust and long-term value in every project.

- **Partners include energy and construction.**

Government ensures compliant growth.

Long-term contracts ensure stability.

Ethics drive responsible mining.

Warner & Spencer

Expanding Our Global Reach

Expanding globally with innovation, diversification, and sustainability-driven mining solutions.

- Expansion targets new mining regions.
- Innovation drives automation efficiency.
- Diversification strengthens resources.
- Sustainability expands renewable use.
