Game Overview

BLOOM SORT!

Bloom Sort is a mobile merge puzzle game available on both the App Store and the Google Play Store. In the game, players enjoy sorting vibrant flower petals and merging them to form beautiful blossoms. The goal is to organize scattered flower petals by moving them between pots and combining them to create whole flowers. Bloom Sort includes a variety of intriguing features that are unlocked as the player progresses through the game. The features include Unlockable flowers, Boosters, and daily challenges.

Unique Selling Points

- The game's **simplicity** ensures that individuals aged 12 and above can effortlessly play, comprehend and at the same time build focus skills.
- The game's UI is **user-friendly** and easy to navigate.
- An **interactive narrative** introduces endearing flower characters with unfolding stories as the game progresses.
- Players can enjoy an **engaging experience** with vibrant colors, appealing graphics, and background music that creates a relaxed atmosphere.
- The game can be played **offline**, providing flexibility and accessibility.
- **User-generated content** promotes a sense of community and creativity by allowing players to create and share their own garden layouts or flower arrangements.

Navigating Our Marketing Journey

Target Market

The target market for the game includes people of all genders aged greater than 12.

Casual game players

Bloom Sort is a fun and challenging puzzle game ideal for casual players seeking a peaceful and visually pleasing experience.

Puzzle game enthusiasts

Bloom Sort's primary mechanic of sorting and merging flowers attracts players who appreciate puzzle games of all kinds.

Fans of aesthetically pleasing games

Bloom Sort's bright and colorful graphics, together with its relaxing music and nature theme, make it visually appealing to players that value aesthetics in their games.

Competitor Analysis

International Competitor

01 Moon Active

Moon Active produces captivating entertainment enjoyed by millions of players worldwide. Its game **'Zen Match - Relaxing Puzzle'** stands out as a modern mahjong tile match game with over 10M+ players. Zen Match is the top-rated tile-matching game for puzzle enthusiasts, with a **4.3 rating** from **480,000 reviews** and over **10 million downloads** on the Google Play Store. On the App Store, it has a **4.6 rating** and ranks **183rd** in the Puzzle genre. The game promotes itself on Facebook and Instagram, sharing statics of the game, updates on new features, and rewards. However, it lacks user-generated content or videos, and notably, it has yet to venture into advertising on TikTok.

Local Competitor

02 Sablo Studios

Sablo Studio, based in Pakistan, specialises in publishing hyper-casual games, with a particular emphasis on puzzle genres like Bloom Sort. Among its games is **'Slinky Sort'**, where players are engaged in sorting vibrant rings, providing a blend of challenge and relaxation. Slinky Sort has achieved over **1,000+ downloads** on the Google Play Store. Despite its potential, the game has not been promoted on TikTok, and its overall marketing efforts have been minimal.

International Competitor

03 Sugame Studios

Sugame aspires to be the leading puzzle game company in Vietnam and is committed to providing high-quality products and outstanding gaming experiences that provide joy and happiness to people all over the world. Sugame Studio, founded in 2016, quickly rose to become one of Vietnam's most promising puzzle game firms. Two of its most popular games, **'Ball Sort'** and **'Water Sort'**, are in the same genre as Bloom Sort and have received a lot of attention. Ball Sort Puzzle is a color sorting game in which players switch identically colored balls into allocated tubes—a simple, engaging, and addictive experience. On the other hand, Water Sort entails sorting different colored liquids into given bottles so that each bottle contains just one color of liquid. These games have made an impact, with Water Sort receiving a **4.6 rating from 20.3K reviews** and more than **1 million downloads** on the Play Store. Meanwhile, Ball Sort has a **4.4 rating from 20K reviews** and has been downloaded over **5 million times** from the Play Store.

Both games' advertisements have focused on short form videos (20-30 seconds) of the game highlighting its visuals and the gameplay. The main objective and call to action has been to increase the number of downloads. Below are some of the statistics of the creative.

GAMES REVIEW

GAME	LIKES	DISLIKES
SABLO STUDIO'S SLINKY SORT	Simplicity of the game.	Lack of vibrant user interface.
	Availability of rewards, creating your own avatars, and themes.	Music is not in line with the game.
MOON ACTIVE'S ZEN MATCH	Rewards and ability to customize stuff inside the game.	Too much difficulty at higher levels. The increase in difficulty is not linear.
	Visually attractive user interface with vibrant colors.	Engagement activity given can be improved.
SUGAME STUDIOS'S BALL SORT	Very simple and easy to play.	The ad percentage is too high compared to other games.
	Relaxing music which goes in line with the game.	User interface and graphics can be improved.
SUGAME STUDIOS'S WATER SORT	Very simple and easy to play.	The ad percentage is too high compared to other games.
	Relaxing music which goes in line with the game.	User interface and graphics can be improved.

Creative Review

Creative	Budget Spend	Click Through Rate	Install Rate	Cost Per Install
1	$10,000	6%	82%	$1.9
2	$21,000	4%	90%	$2.3
3	$6,000	7%	78%	$1.7
4	$500	16%	98%	$0.8
5	$8,500	10%	85%	$2.0
6	$12,000	9%	66%	$2.1
7	$9,000	9%	74%	$2.5

Formulas used for the analysis

- Cost per Install = Budget Spend/Number of Installs
- **Number of Installs = Budget Spend/Cost per Install**
- App Conversion rate = Number of Installs/Number of Impressions
- By Letting Number of impressions as x, number of installs = Install rate * Click throughs where Click throughs = Impressions * CTR. Therefore, Number of installs = Install rate * CTR * impressions (x). **App conversion rate = (Install rate * CTR * impressions (x)/Impressions (x)* 100**
- **% Cost per Install of the total ad budget = (Cost per Install/Budget Spend) * 100**
- **Number of Installs per one dollar spent = Number of Installs/Total budget spend**
- ROAS (Return on Ad spent) is another important metric that could have been used in the analysis. However, revenue per install is not given and will be different in all the mentioned creatives.

Creative 1:

Number of Installs = 5263
App conversion rate (Impression to Install) = 4.92%
% Cost per Install of the total ad budget = 0.019%
Number of Installs per one dollar spent = 0.526
Creative 1 demonstrated strong performance in the campaign with 5,263 installs, a notable app conversion rate of 4.92%, an efficient % Cost per Install of 0.019% relative to the total ad budget, and an impressive 0.526 installs per one dollar spent.

Creative 2:

Number of Installs = 9130
App conversion rate (Impression to Install) = 3.60%
% Cost per Install of the total ad budget = 0.011%
Number of Installs per one dollar spent = 0.435
Creative 2 achieved 9,130 installs with a 3.60% app conversion rate, showcasing cost-effectiveness with a % Cost per Install of 0.011% and 0.435 installs per one dollar spent.

Creative 3:

Number of Installs = 3529
App conversion rate (Impression to Install) = 5.46%
% Cost per Install of the total ad budget = 0.028%
Number of Installs per one dollar spent = 0.588
Creative 3, with 3,529 installations, stood out with a high app conversion rate of 5.46% and efficiency metrics % Cost per Install of 0.028% and 0.588 installs per one dollar spent.

Creative 4:

Number of Installs = 625
App conversion rate (Impression to Install) = 15.68%
% Cost per Install of the total ad budget = 0.16%
Number of Installs per one dollar spent = 1.25
Creative 4, although securing 625 installs, exhibited exceptional app conversion at 15.68%, with a % Cost per Install of 0.16% and a remarkable 1.25 installs per one dollar spent.

Creative 5:

Number of Installs = 4250
App conversion rate (Impression to Install) = 8.5%
% Cost per Install of the total ad budget = 0.024%
Number of Installs per one dollar spent = 0.5
Creative 5 achieved 4,250 installations and an 8.5% app conversion rate, maintaining cost-effectiveness with a % Cost per Install of 0.024% and 0.5 installs per one dollar spent.

Creative 6:

Number of Installs = 5714
App conversion rate (Impression to Install) = 5.94%
% Cost per Install of the total ad budget = 0.018%
Number of Installs per one dollar spent = 0.476
Creative 6 displayed solid performance with 5,714 installs, a 5.94% app conversion rate, and efficient metrics at 0.018% % Cost per Install and 0.476 installs per one dollar spent.

Creative 7:

Number of Installs = 3600
App conversion rate (Impression to Install) = 6.67%
% Cost per Install of the total ad budget = 0.027%
Number of Installs per one dollar spent = 0.4
Creative 7 secured 3,600 installs, boasting a 6.67% app conversion rate, a % Cost per Install of 0.027%, and 0.4 installs per one dollar spent, contributing to a successful overall campaign.

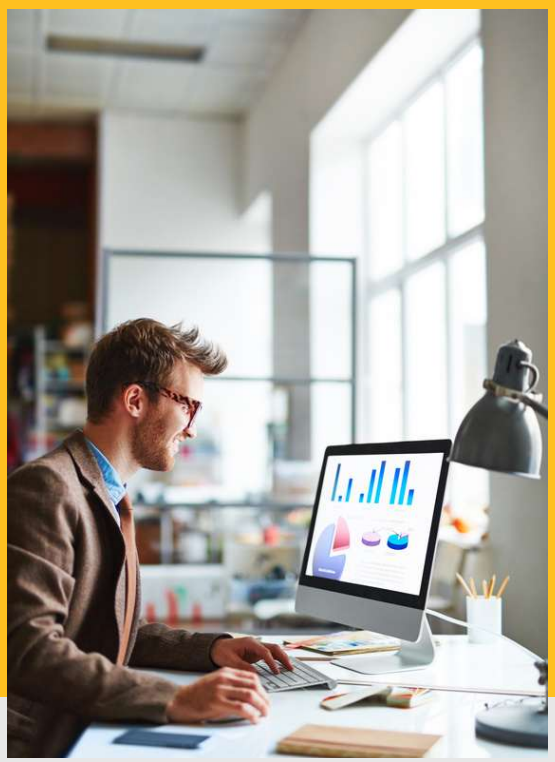

Based on the provided metrics, **Creative 4** stands out for scaling. It demonstrates exceptional click-through and Install rates at 16% and 98%, respectively. This indicates a strong engagement with the ad content, resulting in a high percentage of users installing the game. With 1.25 installs per dollar, creative 4 is the most cost-effective among the options. Given the low budget spend of $500, there is room for scalability. If the creative performs well with a small budget, there's potential to increase the budget gradually while maintaining cost-effectiveness. The strong engagement and cost-effectiveness make Creative 4 a viable option for the long term. The low CPI suggests efficient user acquisition, contributing to sustainable growth. While Creative 4 appears to be the initial choice, it's essential to continuously evaluate the performance. **Creative 5** remains a viable alternative, particularly if Creative 4 doesn't yield desired outcomes when scaled with higher budgets. Creative 5 has achieved positive results and generated a higher number of installations with a higher budget.

MARKETING REPORT

MARKETING STRATEGY

User Acquisition

Bloom Sort currently has no ads on TikTok. However, it is critical for Mindstorm to advertise the game on TikTok since their desired audience actively engages with the platform.
For User Acquisition, Mindstorm should focus on content marketing specifically tailored for TikTok. This includes

01. Short-form Videos

Create short videos and highlights that capture the essence of the game and create excitement in the audience. They should leverage TikTok's engaging video format showcasing all game features including gameplay highlights, Unlockable flowers, Boosters, and visually appealing flower combinations.

02. Playable

Develop interactive playable ads that allow viewers to experience a snippet of the gameplay directly within the TikTok app. This interactive approach can provide a hands-on feel, enticing users to click and install the app.

03. Statics

Static Ads can be displayed on the platform with attractive graphics of the game and a call of action to download the game.

Influencer Marketing

The company should collaborate and partner with TikTok influencers who align with the target audience's interest in mobile gaming and have a similar following. Influencers can create content, share their gaming experiences, and promote the game to their followers.

MARKETING REPORT

MARKETING STRATEGY

Moreover, Use TikTok algorithms to **optimize the search** and improve the listing of game-related content. Focus on relevant **keywords, tags,** etc. Furthermore, implementing **paid advertisements** and **targeted advertising efforts** will play an essential role. **Pay-per-click ads** can increase traffic to the game. The app can also incorporate the introduction of limited-time events in the game. By featuring these unique aspects in their ads, the game creates a sense of urgency and exclusivity, which compels users to download the game to not miss out on the fun.

The last part of the user acquisition includes engagement. Launch TikTok **hashtag challenges** related to flower arranging or merging concepts.
Encourage users to share their in-game achievements using a branded hashtag, fostering **user-generated content** and community involvement. Users can share videos of their gameplays and highest levels they have reached with game hashtags. The strong trust factor of this **word-of-mouth advertising** creates engagement and encourages other people to download the game. We can also implement **referral programs** where players could tag their friends in the comments and upon their friends downloading the app with their invite, they can unlock game features.
Lastly, it is very important to include clear **calls-to-action** in the captions or video overlays, directing users to download Bloom Sort on the App Store or Google Play Store.

All the above strategies would work because TikTok is a visually driven platform, and showcasing the vibrant and visually appealing aspects of Bloom Sort aligns with the platform's content preferences. Moreover, interactive engagement and hands-on approach with playable can lead to higher **conversion rates.** Other than this, aligning with popular TikTok trends, challenges, and music helps Bloom Sort integrate seamlessly into the TikTok community, increasing the likelihood of content discovery.

Partnering with influencers adds authenticity and credibility to the promotion, leading to higher conversion rates. Other than this, User-generated content including hashtag challenges encourage user participation, creating a sense of community around the game. It acts as social proof, attracting more players. Lastly, the engaging themes of the game addresses potential players' curiosity, making them more likely to download the game and explore these features themselves. As user acquisition is five times as expensive as retaining a customer, it is very important to ensure that the game keeps the existing players engaged.

MARKETING REPORT

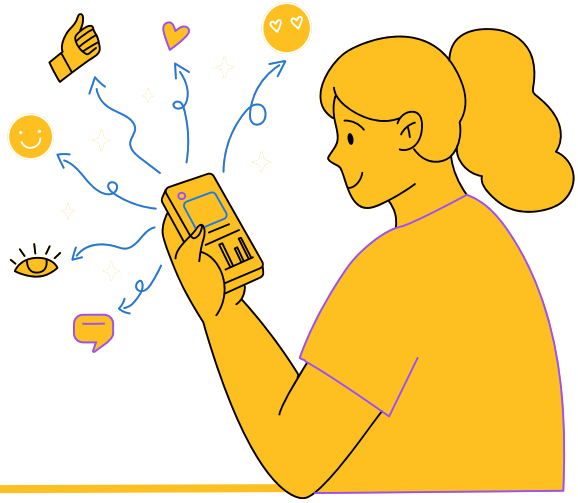

ENGAGEMENT STRATEGIES

1 Enhancing the Social Aspect

Enhance the social aspect of Bloom Sort by incorporating features that allow players to connect and compete with friends or the broader gaming community. The users can invite players to play with them online and compete in teams with each other. Moreover, the communication aspect can really engage players. While playing the game online with friends or strangers, gamers could converse via voice chat and audio calls. This can create more excitement and would ensure users spend more time on the app and make new friends.

2 Competitiveness and themes

The game can host live in-game events or tournaments regularly, encouraging players to participate in real-time competitions. Encouraging top performers to receive special prizes fosters competition and increases player engagement. The rewards can be as good as cash prices or unlocking app purchases. Moreover, to ensure the users are fully engaged, frequent theme changes, where the game's visuals and flowers are altered can really encourage players to visit the app more often.

MARKETING REPORT

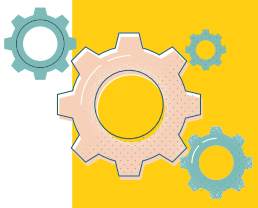

Key Performance Indicators (KPIs)

User Acquisition

- **Number of Installs:** Measures the total downloads of the game from App store and Google Play store, indicating the effectiveness of marketing efforts in acquiring new users.
- **Cost per Install:** Determines the typical expense associated with bringing on a new user. Helps in determining the efficiency of the advertising budget in driving installations.
- **App conversion rate (Impressions to Install)**: The percentage of viewers that downloaded the advertisement.

These measurements directly evaluate the effectiveness of user acquisition efforts, providing insights into the campaign's reach and financial viability.

Conversion

- **Click-Through Rate (CTR):** This metric assesses the proportion of users who click on the advertisements, reflecting the effectiveness of creative content in capturing attention.
- **Install Rate:** Indicates the proportion of people who install the game after clicking on an ad, providing insights into the conversion from clicks to installations.

Conversion metrics aid in evaluating the effectiveness of marketing material and its capacity to encourage desired user behavior.

Engagement

- **Daily Active Users:** Indicates how many players are actively participating in the game every day, highlighting engagement and retention.
- **Session Duration:** This metric gauges how much time users spend on average using the app, providing insight into their degree of satisfaction and engagement.
- **Number of Logins through Invite codes:** Indicates how many of the users have installed the app through a referral.

Tracking user engagement metrics is crucial to figuring out how well the marketing plan draws and holds the audience's attention.

Retention

- **Retention Rate:** Shows the proportion of users who are still active following installation and offers insights into sustained usage.

This rate can be carried out every week. These metrics are essential for comprehending how well a game maintains player attention over time.

User-Generated Content

- **User-Generated Content volume:** Indicates the amount of user-generated content created and the hype the game is getting.

Social metrics evaluate the effectiveness of tactics meant to build a gaming community and acquire more users.

Profitability

- **Return on Ad Spend (ROAS):** Calculates the revenue generated from advertising efforts compared to the ad spend, indicating the financial impact of the marketing strategy.

Ad performance metrics assess the ROI of advertising efforts and help optimize campaign strategies.

MARKETING REPORT

GOOGLE PLAYSTORE ICON

The new icon emphasizes the game's core element, blooming flowers, which aligns with the gameplay. The use of vibrant colors and a visually pleasing arrangement captures attention and conveys the essence of the game effectively.

CONCLUSION

Finally, the analysis concludes that Bloom Sort's success in a competitive market requires a comprehensive approach that includes effective user acquisition techniques, engaging content creation, and a strong implementation of KPIs. By regularly monitoring and optimizing these parameters, the game can improve its market presence, build a loyal user base, and achieve long-term success in the dynamic puzzle game business.
